Monday

My dear Wencoban,

There is a man - professor of New York University, who has toured Africa in search of informations of painters, sculptors & their works. He is writing a book on that. When he came to interview me he also asked me about you & if he could see you. But I told him that you were in Paris ~~but~~ at the moment absent - probably in the South of France. I also promised I would look up if you were back.

———— This of course you understand, I did it because I didn't know you would like to meet him. For this reason do please give me a ring at your very earliest telling me if you would care to see him or not.

Hope Wanya if very well.

My love to Sanja & yourself.

Gerard
